### Understanding your 5-year Investment Plan returns

This table provides a snapshot of how your money could have grown if you invested €1,000 in the assets contained in the **Europe Plan** via the BUX platform at the start of 2020. Your Investment is spread according to the allocation of the Investment Plan in the app.

Here's how it works:

#### 1. Yearly growth

Each year, your investments grow or shrink based on how the specific stocks and ETFs perform. The percentages you see in each column show how much the price of that particular asset changed in a given year. The price of iShares EURO STOXX Small UCITS increased 8,27% in 2020. That means if you had €200 in that asset, it would have become €216,53 by the end of the year.

#### 2. Costs

We want to give you the most realistic picture, so we factor in our fees. These include ETF fees and other costs like spreads and FX markup. If the value of your investment at the end of 2020 was €216,53 and the associated fee was 0.40%, then the net value of your investment in that asset would have been €215,67. Please note that we assume a deduction of our monthly service fee from the moment it was introduced in April 2023.

#### 3. Totaling returns

The next year's growth (21,61%) is then applied to €215,67, the costs are deducted once again, and so on. By the end of 2024, this results in a net value of €228,89. This means your initial €900 investment in this asset would grow by 14,45%.

### Costs

Cost type indicated with colour below.

Cost type	%
Bid/Ask Spread	0.03
FX markup	0.25
<b>Spread + FX markup</b>	<b>0.28</b>
<b>Monthly Service Fee</b>	<b>3.00</b>
BUX charges a service fee of €3 per month from April 2023 onward	
<b>ETF fees</b>	
iShares EURO STOXX 50 UCITS	0.10
iShares EURO STOXX Mid UCITS	0.40
iShares EURO STOXX Small UCITS	0.40
iShares STOXX Europe 600 UCITS	0.20
